16. What is lead generation?

Lead generation is important in SEO for performing well-planned digital marketing. It is used to create interest in a product or service that generates a pipeline for sales.

It focuses on conversations and involves the collection of prospective customer contact details, which include name, email, contact number, and address, to reach them easily.

17. Define conversion optimization

Conversion optimization is the practice of

determining a site to increase its ratio of converting visitors into prospective customers by motivating the purchase of a product or service.

Conducting A/B testing helps with the execution of two different web pages with altered content or design to see which brings more conversation.

18. Why are image alt tags essential?

- Image alt tags are alternative texts to display for people who have trouble viewing images of web pages.
- It is also a process of converting them into text-to-audio for the audience, which depends on audio services via the Internet.
- It helps the viewers know what the image represents by improving the user experience, which will be effective for **SEO** campaigns.

19. What is schema markup?

Schema markup is a code or semantic vocabulary that is placed on a website to help search engines return more useful insights for users. It generates enhanced descriptions, also referred to as rich snippets, to make them appear in search results.

20. What are the three major techniques of SEO?

SEO can be done using three different techniques White hat SEO, Black hat SEO, and Grey hat SEO.

White hat SEO is popular of all, as it utilizes methods to improve the search engine rankings of a site as per the search engine guidelines. It uses high-quality content, website HTML optimization, restructuring, and link acquisition. It brings long-lasting growth in rankings.

Black hat SEO is the utilization of the weaknesses of search engine algorithms to get a high ranking. It does not follow search engine guidelines and it will be done through keyword stuffing, hidden text, link spam, and hidden links. It has short-lasting growth

and the result will always be unpredictable.

Grey hat SEO combines both techniques and it transforms as per trends and scope.

21. What is Google AdWords Remarketing?

Google AdWords Remarketing is a popular targeted marketing strategy that helps marketers approach visitors to convert them into customers. It helps in targeting the right people at the right time with the right ad. It increases the conversion rate by making people familiar with the brand, which attracts prospective customers.

22. What is AMP?

AMP is the abbreviation for Accelerated Mobile Pages, which makes fast mobile pages and it is the project of Twitter and Google. It is an open-source library to help in developing a lightweight and fast-loading web page.

It allows marketers to create mobile-friendly web pages that support various platforms and provide compatibility for access from any device.

23. What is KPI and how can you use it in social media reporting?

KPI is a key performance indicator and can be used for Reach, Engagement, Leads, Conversion, Likes, Shares, Traffic Data, Active Followers, and Brand Mentions.

24. Define CTR, and how do you calculate it?

CTR is the abbreviation for click-through rate that produces the number of visitors who have viewed your promotion of a website and it is calculated as follows:

$CTR = \text{number of Snap} / \text{Number of impressions} * 100.$

25. Define Adwords and AdSense

AdWords allows marketers to advertise on Google's network and AdSense allows publishers to reserve space for AdWords on a website.

26. What is important: the number of engagements or the number of followers?

Social media marketing does not depend on the number of followers; it depends on the conversion of these followers into buyers by boosting the business and it is important to increase engagements for a site.

27. How can you bring digital traffic to a site instantly?

Social media posts play an important role in driving immediate website traffic. It includes giveaways, contests, promotions, and time-sensitive material.

Lead generation through engagement and responses to customer queries is also the best way to create digital traffic effectively.

28. How can you prove that online marketing is more effective than offline marketing?

Online marketing is considered better than offline marketing, as the marketer can reach a large audience and expand geo-locations easily and all the information will remain online for anytime access.

It is powerful as the marketer interacts with customers more easily and effectively, which brings a better ranking for a website.

Conclusion
