at our [**Oracle DBA Training in OMR.**](#)

10. **Online Ticket Booking System**

Objective: Build a system for efficiently booking tickets for events, flights, or travel.

Tasks: Develop a database to track events, available seats, and bookings. Implement secure payment processing features and create user-friendly interfaces for selecting and confirming tickets.

Skills Acquired: SQL for database interactions, application development skills, and knowledge of payment integration.

11. **Recipe Management Application**

Objective: Create an application for managing and sharing recipes.

Tasks: Design a database for recipes, ingredients, and user contributions. Implement features for searching recipes based on dietary preferences and generate metrics for user engagement.

Skills Acquired: SQL for database management, insights into culinary arts, and user interface development.

Students can learn Microsoft Azure at our [**Microsoft Azure Training in OMR.**](#)

12. **Fitness Tracking System**

Objective: Develop a system to track fitness activities and user progress effectively.

Tasks: Create a database for workouts, nutrition logs, and user profiles. Implement features for goal setting and generate reports on fitness achievements.

Skills Acquired: SQL and database design skills, understanding of fitness tracking principles, and reporting capabilities.

13. **Document Management System**

Objective: Build a secure system for storing and managing documents.

Tasks: Design a database for document

metadata, implement version control features, and create user access controls to ensure data security.

Skills Acquired: SQL for database interactions, database security practices, and understanding document workflows.

Students can learn Java at our [Java Training in OMR](#)

[Oracle Database Administrator Salary in Chennai](#)

14. **Course Registration System**

Objective: Create a system for effectively managing course registrations in educational institutions.

Tasks: Develop a database for courses, students, and registrations. Implement features for enrollment management and generate reports on course popularity and student demographics.

Skills Acquired: SQL and database management skills, understanding educational administration, and reporting techniques.

15. **Digital Asset Management System**

Objective: Develop a system for managing digital assets like images and videos.

Tasks: Create a database for storing asset metadata, implement search functionalities for easy retrieval, and establish user access controls for managing asset usage.

Skills Acquired: SQL for data management, principles of database design, and understanding digital asset management.

Students can learn Oracle DBA in virtual mode at our [Oracle DBA Online Training](#).

16. **Voting System Application**

Objective: Build a secure application to manage voting processes.

Tasks: Design a database for candidates, voters, and votes. Implement voter authentication features, result tallying, and ensure data security through encryption.

Skills Acquired: SQL and database security practices, understanding electoral processes, and reporting skills for election results.

17. Healthcare Appointment System

Objective: Create a system to manage patient appointments in healthcare facilities.

Tasks: Develop a database for patient records, appointments, and healthcare providers. Implement scheduling features and create reminders to reduce no-shows.

Skills Acquired: SQL and database management, understanding healthcare workflows, and reporting capabilities.

Students can learn SQL from their home at our [**SQL Server DBA Online Training**](#).
