Related Posts

Quick Enquiry

- Write efficient PL/SQL procedures for adding, updating, and deleting employee records.
- Create functions to calculate bonuses based on performance metrics.

Skills Acquired: Gain knowledge in database design principles, efficient PL/SQL coding, and data analysis techniques for bonus calculations.

2. Library Management System

Objective: Create a system to effectively manage books, members, and lending activities in a library.

Tasks:

- Establish relational tables for books, members, and loans.
- Write PL/SQL scripts to handle book checkouts and returns.
- Generate reports on overdue books and popular titles.

Skills Acquired: Develop expertise in report generation, database normalization, and transaction management critical for library functions.

Professionals can update their knowledge on Oracle PL SQL by enrolling at our [Oracle PL SQL Training in Chennai](#).

3. Sales Tracking System

Objective: Build a system to track sales activities and analyze data over time.

Tasks:

- Design tables for products, customers, and sales transactions.
- Write PL/SQL procedures to accurately insert and update sales data.
- Create functions to compute total and average sales per product.

Oracle PL SQL Interview Questions and Answers

4. Inventory Management System

Objective: Develop a system to oversee inventory levels, suppliers, and automate restocking alerts.

Tasks:

- Set up tables for products and suppliers.
- Write PL/SQL triggers to automatically update stock levels after sales.
- Create alerts for low stock situations to prevent shortages.

Skills Acquired: Learn trigger creation, develop alert mechanisms, and enhance inventory control skills.

5. E-commerce Platform

Objective: Create a simplified e-commerce platform for managing product listings and customer orders.

Tasks:

- Design the database schema for products, customers, and orders.
- Implement PL/SQL functions for order processing and payment confirmation.
- Write procedures for addressing customer feedback and inquiries.

Skills Acquired: Gain experience in web application database design, transaction management, and user interaction handling.

Students can master Oracle at our **Oracle Training in Chennai**.

6. Hotel Booking System

Objective: Build a system to manage hotel reservations, room availability, and guest information.

Tasks:

- Create tables for rooms, guests, and bookings.
- Write PL/SQL procedures for making and canceling reservations.
- Generate reports on booking trends and customer demographics.

Skills Acquired: Enhance report generation skills, procedure writing, and data integrity management.

7. Student Information System

Objective: Develop a system for managing student records, courses, and grades.

Tasks:

- Design a database schema for students, courses, and enrollment.
- Write PL/SQL functions to calculate GPAs based on grades.
- Create procedures for registering and deregistering students.

Skills Acquired: Learn about educational data management, complex query writing, and performance analysis in academic contexts.

Students can learn Pega at our **[Pega Training in Chennai](#)**.

8. Payroll System

Objective: Create a system for managing employee payroll and tax calculations.

Tasks:

- Set up tables for employee details, salaries, and deductions.
- Write PL/SQL procedures for accurate payroll processing.
- Generate reports for tax filings and salary summaries.

Skills Acquired: Gain skills in financial calculations, regulatory compliance, and payroll management techniques.

9. Feedback Management System

Objective: Develop a system to collect and analyze customer feedback.

Tasks:

- Create tables for feedback submissions and responses.
- Write PL/SQL procedures to analyze feedback trends over time.
- Generate reports summarizing customer satisfaction and areas for improvement.

Skills Acquired: Develop data analysis, feedback mechanisms, and advanced reporting skills.

10. Online Quiz System

Objective: Build a system to manage quizzes and track student performance.

Tasks:

- Design tables for questions, answers, and user scores.
- Write PL/SQL procedures to evaluate quiz results.
- Create functions to display user performance and leaderboard rankings.

Skills Acquired: Enhance skills in scoring algorithms,

data retrieval, and performance metrics analysis.

Oracle PL SQL Developer Salary in Chennai

11. Budget Management System

Objective: Develop a system to monitor expenses and efficiently manage budgets.

Tasks:

- Set up tables for income, expenses, and budget categories.
- Write PL/SQL procedures for adding and categorizing transactions.
- Generate monthly budget reports to visualize spending.

Skills Acquired: Learn financial tracking methods, budgeting techniques, and report generation skills.

Students can also master Oracle DBA by enrolling at our **Oracle DBA Training in OMR.**

12. Health Records Management System

Objective: Create a secure system for handling patient health records while safeguarding privacy.

Tasks:

- Create tables for patient details, medical history, and treatment records.
- Create PL/SQL procedures to securely update and access patient information
- Implement security features to protect sensitive health data.

Skills Gained: Acquire knowledge in data security practices, management of health information, and compliance with regulations.

13. Task Management System

Objective: Develop a system for managing and monitoring tasks within a team or organization.

Tasks:

- Set up tables for tasks, users, and statuses.
- Write PL/SQL procedures for task assignments and status updates.
- Create reports to analyze task completion rates and evaluate team performance.

Skills Acquired: Enhance project management skills, team collaboration techniques, and status tracking abilities.

Students can learn Oracle at our [**Oracle Training in OMR**](#).

14. **Event Management System**

Objective: Create a system to manage events, registrations, and attendee information.

Tasks:

- Design tables for events, participants, and registrations.
- Write PL/SQL procedures for managing participant registrations.
- Generate reports on event attendance and feedback.

Skills Acquired: Learn event organization skills, data management techniques, and participant tracking methods.

15. **Social Media Analytics System**

Objective: Develop a system to analyze social media interactions and engagement.

Tasks:

- Create tables for posts, likes, comments, and interactions.
- Write PL/SQL procedures to calculate engagement metrics.

- Generate reports on social media performance.

Skills Acquired: Enhance data analytics capabilities, trend analysis skills, and understanding of performance metrics.

Professionals can update their knowledge in Oracle PL SQL by being at the comfort of their homes by enrolling at our [**Oracle PL SQL Online Training**](#).

16. **Expense Reimbursement System**

Objective: Build a system to manage employee expense claims and reimbursements.

Tasks:

- Set up tables for employee claims and approval statuses.
- Write PL/SQL procedures for submitting and approving claims.
- Generate reports on reimbursement trends.

Skills Acquired: Learn claim management techniques, workflow processes, and reporting skills.

17. **Real Estate Management System**

Objective: Create a system to manage property listings, inquiries, and client interactions.

Tasks:

- Design tables for properties, clients, and inquiries.
- Write PL/SQL procedures for managing property listings.
- Generate reports on property views and client engagement.

Skills Acquired: Learn real estate data management, client interaction techniques, and reporting skills.

Students can remote learn DevOps at our [DevOps Online Training](#).

18. Voting Management System

Objective: Develop a system to manage voting processes, including elections.

Tasks:

- Create tables for candidates, voters, and votes.
- Write PL/SQL procedures for casting and counting votes securely.
- Generate reports on election results and voter participation.

Skills Acquired: Learn about voting mechanisms, data integrity practices, and results analysis techniques.

19. Ticket Reservation System

Objective: Build a system to manage ticket bookings for events or travel.

Tasks:

- Set up tables for events, tickets, and bookings.
- Write PL/SQL procedures for booking and canceling tickets.
- Generate reports on ticket sales and customer preferences.

Skills Acquired: Enhance reservation management skills, data analysis capabilities, and reporting techniques.

Students can learn Agile from their home, by enrolling at our [Agile Online Training](#).

20. Recipe Management System

Objective: Create a system to manage recipes, ingredients, and user ratings.

Tasks:

- Design tables for recipes, ingredients, and user ratings.
- Write PL/SQL procedures for adding and updating recipes.
- Generate reports on popular recipes and user feedback.

Skills Acquired: Learn culinary data management, user feedback handling, and reporting skills.
