5. Sales Reporting System

Objective: Implement a system that generates in-depth sales performance reports to guide business strategy.

Tasks: Build a dedicated reporting database, write complex aggregate SQL queries to summarize sales data, and visualize results using reporting tools.

Skills Acquired: Gain proficiency in advanced SQL functions and data visualization techniques to analyze sales trends effectively.

Students can learn RPA at our [Robotic Process Automation Training in Chennai](#).

6. Customer Relationship Management (CRM)

Objective: Create a database that streamlines customer interactions, feedback, and support requests.

Tasks: Design tables for customer information, interaction histories, and feedback while implementing analytics to assess customer satisfaction.

Skills Acquired: Build expertise in data analysis, relationship modeling, and efficient SQL script writing.

7. School Management System

Objective: Develop a comprehensive database to manage student records, course information, and academic performance.

Tasks: Establish tables for students, courses, grades, and schedules, along with reporting features for evaluating academic success.

Skills Acquired: Learn entity-relationship modeling and SQL query techniques tailored for educational settings.

Students can learn SQL at our [SQL Server DBA Training in Chennai](#).

8. **Hotel Reservation System**

Objective: Build a database for efficiently managing hotel bookings, guest data, and room availability.

Tasks: Create tables for rooms, guests, and reservations while implementing real-time booking and availability features.

Skills Acquired: Master SQL techniques for transaction management and ensuring data integrity in a multi-user environment.

9. **Health Records Management**

Objective: Create a secure database to handle patient health records and appointment scheduling.

Tasks: Develop tables for tracking patient information, appointment schedules, and medical histories while complying with data security regulations.

Skills Acquired: Understand best practices for data security and SQL queries for managing sensitive information.

Professionals can learn Oracle SQL at our [**Oracle SQL Training in OMR**](#).

10. **Event Management System**

Objective: Construct a database to manage events, attendee registrations, and feedback.

Tasks: Set up tables for events, registrations, and post-event feedback, along with features for scheduling event timelines.

Skills Acquired: Master data modeling techniques and SQL analytics skills for effective event management.

Students can learn Docker at our [**Docker Training in OMR**](#).

11. **Financial Transaction Database**

Objective: Develop a system for tracking financial transactions, budgets, and

expenditures.

Tasks: Create tables for accounts, transactions, and budgets, and build reporting features to monitor financial health.

Skills Acquired: Enhance SQL skills for financial data analysis and reporting to aid budget decisions.

12. Recipe Management System

Objective: Design a database to store and manage recipes, ingredients, and user preferences.

Tasks: Establish tables for recipes, ingredients, and user-generated content, and implement search functionalities.

Skills Acquired: Gain expertise in SQL for data retrieval and normalization for effective data organization.

Students can learn HTML at our [HTML Training in OMR](#).

[Oracle SQL Developer Salary in Chennai](#)

13. Movie Rental System

Objective: Create a database to manage movie rentals, customer accounts, and inventory tracking.

Tasks: Build tables for movies, rental transactions, and customer data while implementing rental history tracking features.

Skills Acquired: Learn data modeling and SQL for transaction processing specific to the entertainment industry.

14. Online Survey Database

Objective: Construct a database to collect, analyze, and report survey responses effectively.

Tasks: Design tables for surveys, questions, and responses, and implement features for data analysis to extract insights.

Skills Acquired: Master SQL for data aggregation and develop reporting techniques that enhance decision-making.

15. **Social Media Analytics Database**

Objective: Build a database to analyze user engagement data from various social media platforms.

Tasks: Create tables to track user interactions, posts, and engagement metrics, and implement reporting features for analytics.

Skills Acquired: Acquire data analysis skills and SQL techniques for managing extensive datasets.

Students can learn SQL Virtually in online mode at our [**SQL Server DBA Online Training**](#).

16. **Project Management System**

Objective: Develop a database to manage project timelines, resources, and task assignments.

Tasks: Create tables for projects, tasks, and team members, and implement reporting features to track progress.

Skills Acquired: Learn project tracking methodologies and SQL techniques for efficient data management.

17. **Sports League Management**

Objective: Create a database to manage sports league schedules, standings, and player statistics.

Tasks: Establish tables for teams, games, and standings, and implement scheduling features for league events.

Skills Acquired: Gain SQL proficiency in scheduling algorithms and maintaining data integrity in competitive environments.

Students can remote learn SMM at our [**SMM Online Training**](#).

[**Oracle SQL Tutorials**](#)

18. Product Feedback System

Objective: Develop a database to collect and analyze customer feedback regarding products.

Tasks: Create tables for products, feedback, and ratings, along with analysis features for product enhancements.

Skills Acquired: Improve data analysis capabilities and SQL skills focused on sentiment analysis.

19. Charity Donation Management

Objective: Build a database to track donations and donor information for charitable organizations.

Tasks: Design tables for donors, donations, and campaigns, and implement reporting features to assess fundraising effectiveness.

Skills Acquired: Learn SQL for transaction tracking and develop reporting skills to enhance fundraising strategies.

Professionals can update their knowledge on Oracle SQL by enrolling in our [Oracle SQL Online Training](#).

20. Knowledge Base System

Objective: Create a database to effectively store and manage articles, FAQs, and user feedback.

Tasks: Set up tables for articles, categories, and user contributions, and implement content management and search features.

Skills Acquired: Master SQL techniques for content management and data retrieval to enhance user experience.
